CELLULOSE CASINGS

Cellulose casings are designed for high speed, automated production of hot dogs, dry mini salami, cooked and coarse-ground sausages. Casings are made of regenerated cellulose and come as shirred sticks for use on automated stuffing equipment, no soaking required.

CELLULOSE CASINGS ARE PERFECT FOR:

 <p>HOT DOGS</p>	 <p>DRY MINI SALAMI</p>	 <p>COOKED AND COARSE-GROUND SAUSAGES</p>

USAGE ADVICES

IMPORTANT:

- Cellulose casings is intended to be used as a mold to shape the product during food processing and is not meant to be eaten. Casings is indigestible and must be removed prior to eating.

STUFFING:

- Recommended Stuffing Diameters (RSD) indicate the designed stuff diameters. Stuffing below or above these diameters could affect casing performance.

STORAGE & HANDLING:

- Use within 1 year of delivery.
- Store in a cool, dry place. Avoid hot or freezing cold storage areas. Store in original containers.
- To avoid damaging materials, do not open cartons with knives, sharp instruments or hooks.
