CONVERTING

Shirred into sticks. Ready to use immediately when removed from the caddy

STEP BY STEP:

1 Ready to use immediately when removed from the caddy. Do not soak the casings.

2 Settings of the stuffing machine should be adjusted to the diameter and type of the casing. Pay attention to the correct direction of stuffing, indicated on the packaging.

3 Caliber specified on the label corresponds to the caliber after stuffing.

4 Edible collagen casings may be stuffed with manual, semi-automatic and automatic filling machines with automated hanging systems.

5 After stuffing apply appropriate treatment for the given type of the product.
